### DESCRIPTION

Blue Juice® LavFluid (LF) is the premier fully formulated, ready-to-use, environmentally friendly winterized lavatory fluid which combines an SAE AMS 1476 deodorant package with a biobased antifreeze. Blue Juice® LF was designed for aircraft use but is suitable for other market applications including rail, mass transit, marine, recreational vehicle and portable toilets. It is a fully formulated, ready-to-use product - NO mixing required! The patented unique features and benefits of Blue Juice® LF make it an ideal environmentally sensitive alternative to traditional glycol and acetate based winterized lavatory fluids.

Blue Juice® LF is composed primarily of natural ingredients that are cost effective and readily available. Blue Juice® LF is a certified 100% biobased, USDA BioPreferred® product and readily biodegrades in a controlled, environmentally friendly manner.

Blue Juice® LF does not contain corrosive salts and, unlike ethylene glycol-based fluids, Blue Juice® LF is non-toxic and non-hazardous to plant and animal life. Compared to propylene glycol, Blue Juice® LF has a lower Biochemical Oxygen Demand (BOD) and biodegrades at a rate that is more environmentally friendly and less taxing on waste water treatment systems.

**Blue Juice LavFluid has been tested and conforms to all SAE AMS 1476 and Boeing D6-17487 materials compatibility and corrosion requirements as well as Air Force Air Mobility Command Instruction 24-101, Vol. 10, 27 April 2016, page 13 authorizes the use of Blue Juice® LavFluid.**
